Audley Square House

Soft Strip, Asbestos Removal, Demolition

NEWSLETTER

ISSUE: 09

July 2017

Dear Neighbour

Works have been progressing well on site with the demolition now completed down to the ground floor across the site.

Over the coming weeks we have several areas of works on site that I would like to update you on.

Investigation works

To inform the follow-on works regarding perimeter condition and services, areas on site have been identified by the engineers that require further investigation. To complete the investigations will take adopt several different methods to complete the works. Hand breaking, machine breaking and core drilling will be used. We have rationalised the requirement of machine mounted percussive breakers to the minimum in favour of hand works and coring works (quiet works) wherever possible albeit there will be an element of machine breaking in certain areas that do not lend themselves to hand work.

Former filling station works

Works have commenced remove the fuel tanks and associated removal of ground and reinstatement of crushed concrete. These works will involve sheet piling with an excavator mounted vibrating hammer to provide support to the highway, following highway support works materials will be removed from site and replaced with crushed concrete.

Throughout these works we will endeavour to keep disturbance and disruption to a minimum and consider our neighbours at all times.

As a member of the Considerate Constructors Scheme, we shall be working with Westminster City Council and Caudwell Collection to ensure that any inconvenience caused is kept to a minimum.

Should you have any queries regarding the works on site, please contact one of our site team on the numbers on the left of this page.

Should you require further copies of this publication or future emails, please email newsletters@cantillon.co.uk stating the project
