

Mace is pleased to announce that a score of 45 out of a maximum of 45 was achieved on the latest Considerate Constructors Scheme (CCS) visit in December 2022.

CCS Inspector's summary:

*Very comprehensive procedures and care continue to be taken regarding the impact of the site work on the adjoining community all to an exceptional standard. This also applies to environmental issues and the initiatives in place to reduce carbon output. Facilities for the workforce have been increased with the completion of the seven storey cabin block located on a gantry. In short, the project procedures more than cover the requirements of the CCS Registration. Once more many thanks to Dean Emblin - Construction Director, Alice Mann - Assistant Sustainability Manager, Peter Walsh - Communications and Pienaar Diederick for their time input to the second visit.*
